

ADVANCED WORKFLOW WITH 12+ EHR INTEGRATIONS

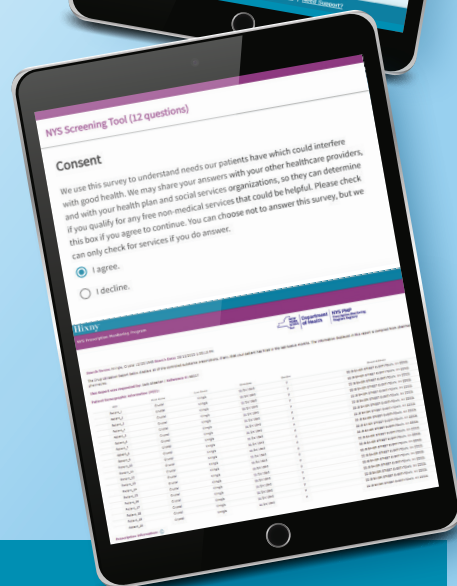

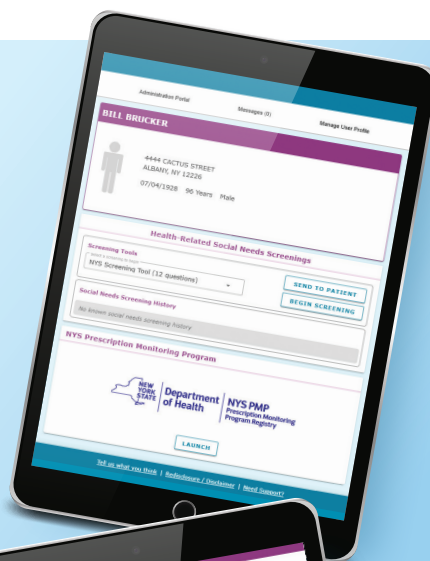

Snapshot NY

With Hixny, screen for social needs and check prescription history without leaving your EHR. The benefits to you:

- Submit screenings for reimbursement directly in your clinical workflow— launches within your EHR.
- Available regardless of patient consent to participate with QE.
- Direct access to the first screening tool validated by NCQA that also meets the requirements of NY's 1115 waiver—including transmittal to all NYS social care networks (SCNs) for reimbursement.*
- One click keeps you logged into† the NYS prescription monitoring program query tool (formerly I-STOP).
- Available at no cost (while funding lasts).

*Facility must have agreement in place with SCN to gain reimbursement.

†The system uses the NYS Health Commerce System (HCS) ID to validate the credentials of the person conducting a search. Practitioners, pharmacists, and designees must maintain their own active HCS ID to be considered authorized to search the NYS PMP through this interface.
